

COAR Annual Meeting - Anticipating the Repository of the Future

Thursday - June 6, 2024
Open Session- all welcome
Drottningporten 1, Post Hotel

14:00 - 15:30

Update of COAR Notify Initiative

1. Introduction to COAR Notify and overview of progress to date
2. Brief demos of current repository implementations
3. Breakout Group discussions
 - a. Very little or no knowledge
 - b. Aware of COAR Notify, but not sure how it could be used in my context
 - c. Interested and want to learn about technical requirements for implementation
4. Discussion: What were/are your misconceptions about COAR Notify? What can we do to address these misconceptions?

Short break

15:45 - 17:00

Introducing some COAR Community Resources

International interoperability for repositories is a critical precondition for developing the global knowledge commons. COAR plays a key role in developing and maintaining interoperability standards that can be adopted by repositories around the world. This session will offer an opportunity to learn about some of the resources promoted by COAR and ask questions about their use by the community.

- Plans for a COAR International Repository Directory
- COAR Multilingualism Recommendations
- COAR Resource Type Vocabulary - Version 4

19:30 COAR Dinner - [Muchacho](#) - Göteborg Vasagata 5a

Friday - June 7, 2024

COAR members and invited guests

[Chalmers campus, Architecture and Civil Engineering, the SBII-house, Sven Hultins gata 6](#)

Room SB-M415

See detailed directions [here](#)

9:00 - 11:00

The Evolution of Network Services

This session will involve a discussion with COAR members and other representatives from different networks about new and emerging value-added services being developed for repositories. We will discuss what services we can expect in the coming years and what will be the implication of these services on repository operations.

- **Petr Knoth, CORE** - Innovations on the horizon for an open access aggregator
- **Vinodh Ilangoan, Open Research Knowledge Graph** - Human-Artificial Intelligence Collaboration for Structuring Scholarly Content

- **Lautaro Matas, LA Referencia** - New services planned for the Latin American repository network
- **Masaharu Hayashi and Masashi Kawai, National Institute of Informatics** - Presenting the NII's national data service in Japan
- **Herbert Van de Sompel**
- **Q&A**

Coffee break

11:30 - 13:00

Future Directions for Repositories

The next two sessions will surface important future innovations and roles for repositories from different regions and identify actions for COAR that will help the community in supporting those trends.

Regional Perspectives

- **Eloy Rodrigues, University of Minho Libraries, Portugal** - Key policy developments in Europe
- **Sara Gonzales, Galter Health Sciences Library and Learning Center, Northwestern University, United States** - Building a fit-for-purpose next generation research repository
- **Martin Borchert, University of New South Wales (UNSW), Australia** - Perspectives from Oceania region
- **Nathalie Fargier, Centre pour la Communication Scientifique Directe, France** - An integrated national approach to shaping the future of scholarly communications
- **Q&A**

Lunch

14:00 - 15:45

Future Directions for Repositories

Domain Perspectives

- **Iryna Kuchma, Open Climate Campaign** - Creating a collection of climate change literature in a distributed repository ecosystem
- **Omo Oaiya, WACREN** - Open science, repositories, and the African public health initiative
- **Jim Entwood, arXiv** - New functionalities in development for the world's largest preprint archive

Interactive Session

- **Kathleen Shearer**

Audience discussion: What are the most important trends?, What do repositories need to do to support these trends?, What use cases / functionalities should COAR prioritize?

15:45 - 16:00

Closing Remarks
